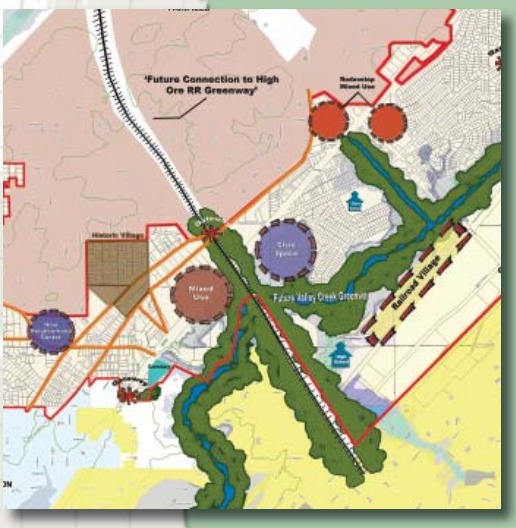
Midfield Master Plan

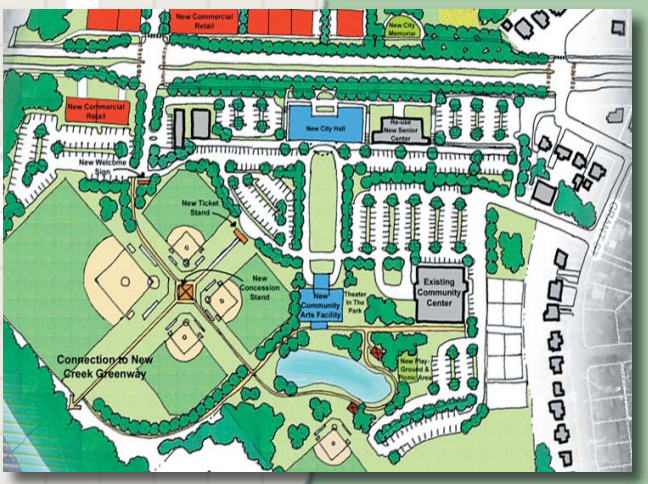
Midfield, Alabama

portfolio

The City of Midfield is a small suburban community located outside Birmingham, Alabama. Due to the sprawling outskirts of the Birmingham Metropolitain Area, it is hard to tell where one community ends and another begins. Lacking a sense of place, the city was looking for ways to distinguished itself and create a sense of community that the citizens could take pride in. 4Site was brought in to participate in a charrette with members of the City Council and the community. The charrette set out to identify short and long-term goals and objectives for city to improvements.



Following the charrette, 4Site developed a conceptual comprehensive master plan for the city. This, along with other illustrations highlighting key improvement areas of the city, help to identify and provide design solutions to solve them.



An Interdisciplinary Approach to Land Planning & Design
